Pic 01- General ledger from Feb01-Feb09

Note: Some data were modified later.

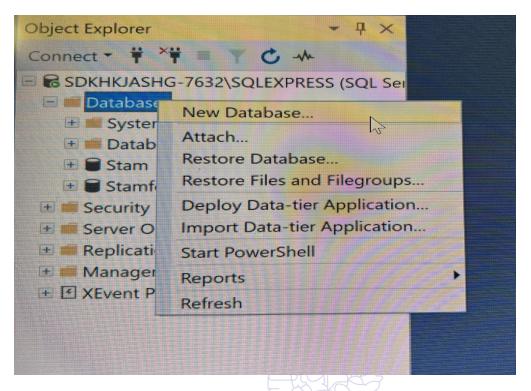

Pic 02- General ledger from Feb10-Feb23

Pic 03- General ledger from Feb24-Feb28

Step 03:-

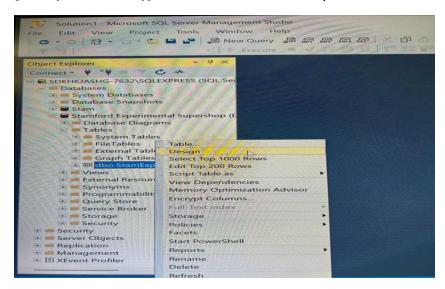

In order to create a table we have to expand the 'Database' menu and right click on 'New Database'.

Pic 04 – First step of creating a database

Step 04:-

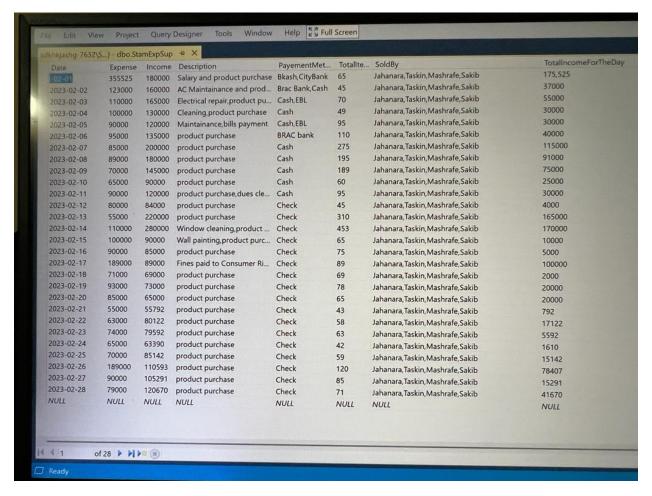

In order to add data to the table we have to right click on the database table [dbo.(tablename)] that we created in step 03 and then click design.

Pic 05 - Filling the table with data.

Step 05:-

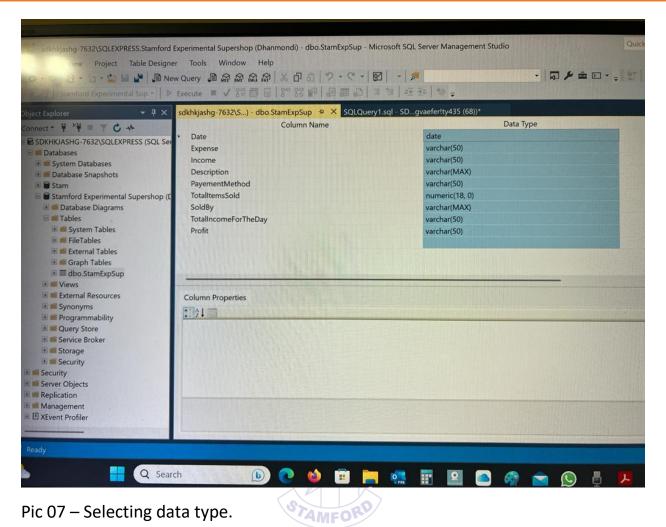

After creating the table we have to save it from the file menu.

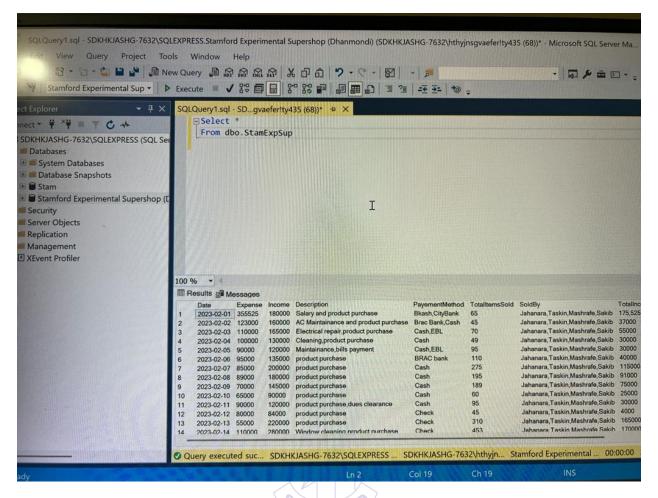

Pic 06 – Final view of the created table.

Step 06:-

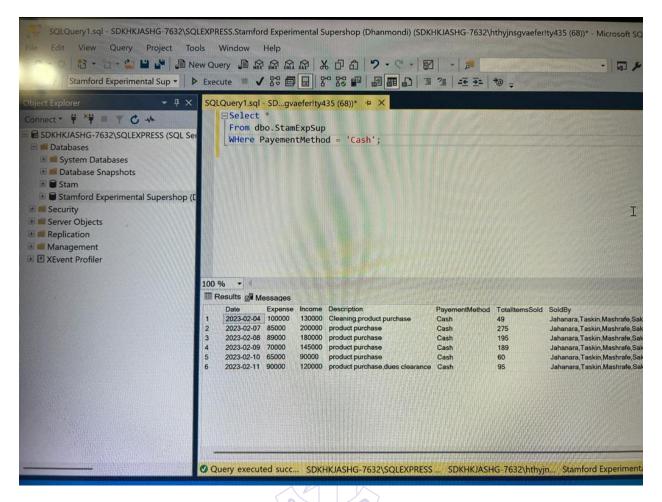

We have to run some basic query commands to make sure that we have entered the data type correctly. We have to select a different data type for each varchar. For example 'TotalItemsSold' we have selected 'numeric (18, 0)' because all its value will be natural numbers or positive integers.

Pic 07 – Selecting data type.

Pic 08 – Using 'Select * 'command to open out database.

Pic 09 – Command for finding where 'Cash' was used clear the payment.
